

Family data sheet

SONO-LED ROUND WALL 2

Self-absorbing acoustic panel made of polyethylene terephthalate (PET) for wall mounting with integrated milled LED stripe on the back, combination version of 2 lights 500mm and 700mm diameter, max.overlap of the two lights 100mm, including wall mounting material, including converter (dimnable on request)

ADVANTAGE

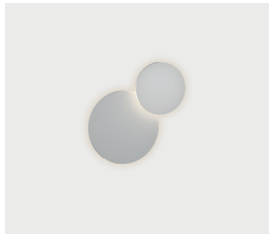

- sound-absorbing - highest absorber class (A)
- made from recycled polyester fibers
- highly compressed and therefore inherently stable
- hardly inflammable according to DIN 4102 B 1
- free of chemical and toxicological additives
- printable or paintable (for an individual design)
- allergy friendly
- Resource-saving, 100% recyclable, CO2 friendly
- breathable, heat-insulating and moisture-resistant
- on request also in other plate sizes and plate colors available

CHARACTERISTICS

- Self-absorbing acoustic panel made of polyethylene terephthalate (PET) for wall mounting with an integrated LED strip milled back
- KOMBI version - from 2 two lights with 500mm and 700mm diameter
- incl. LED strip 10W / m for indirect lighting
- including wall mounting material
- including converter (dimnable on request)

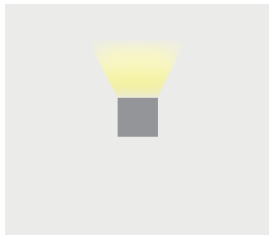

Product overview:

Assembly:

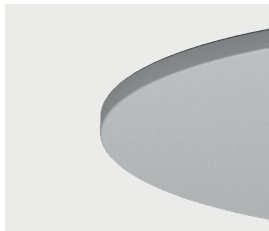

Wall light

Light emission:

indirect

Housing:

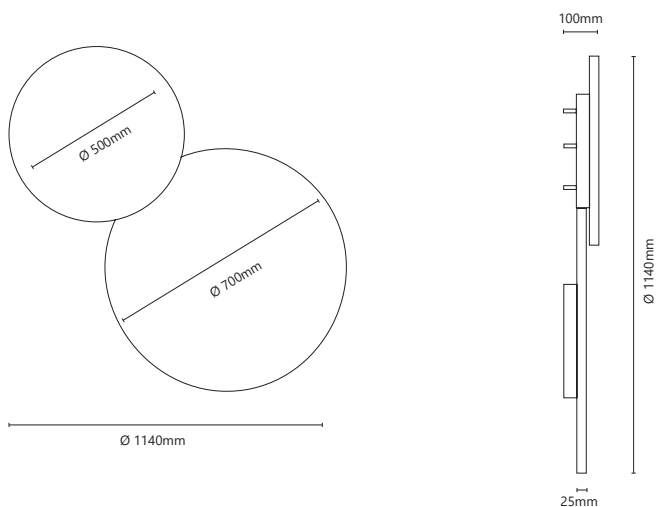

white

Light color:

3000K warm white

Drawings:

Technical information:

INDIRECT VERSION

Diameter:	Ø Kombi
Watt Total:	30W
Net-Lumen:	461lm
Kelvin:	3000K
Protection:	IP20
CRI:	>90Ra
Life expectancy:	50.000h
Voltage:	100 ~ 240V AC/ 24V DC
Protection class:	I
Converter:	including control gear (dimnable on request)
